

1. Install VLC

```
sudo apt update  
sudo apt install vlc -y  
vlc --version
```

2. Update packages

```
sudo apt update  
sudo apt upgrade -y
```

Take a screenshot showing upgraded packages.

3. Remove nano

```
sudo apt remove nano -y  
nano
```

Expected: 'command not found' if removed.

4. List Python packages

```
dpkg -l | grep python  
# or  
apt list --installed | grep python
```

5. Remove unused packages

```
sudo apt autoremove -y
```

Share the terminal output after running the command.
